## PART I  A Simple Introduction to Complex Event Processing  
1 The Global Information Society and the Need for New Technology  
  1.1 Distributed Information Systems Everywhere  
  1.2 The Global Communication Spaghetti Pot  
    1.2.1 Event Causality  
  1.3 Electronic Archeology: Layers upon Layers  
    1.3.1 A Layered Enterprise System  
    1.3.2 Vertical Causality: Tracking Events up and down the Layers  
    1.3.3 Event Aggregation: Making High-Level Sense out of Low-Level Events  
  1.4 The Gathering Storm of New Activities on the Web  
  1.5 Global Electronic Trade  
  1.6 Agile Systems  
  1.7 Cyber Warfare and the Open Electronic Society  
  1.8 Summary: Staying ahead of Chaos  

2 Managing the Electronic Enterprise in the Global Event Cloud  
  2.1 How the Global Event Cloud Forms  
    2.1.1 The Open Enterprise  
    2.1.2 The Global Event Cloud  
    2.1.3 The Electronic Enterprise  
  2.2 Operating in the Global Event Cloud  
  2.3 Going Beyond Workflow  
  2.4 Parallel and Asynchronous Processes  
  2.5 On-the-Fly Process Evolution
## Contents

2.6 Exceptions Must Be First-Class Citizens in Process Design 39
2.7 Summary: Managing the Electronic Enterprise 41

3 Viewing the Electronic Enterprise—Keeping the Human in Control 43
3.1 Today's Event Monitoring Is Too Primitive 44
  3.1.1 System Monitoring Focuses on the Network Layer 44
  3.1.2 Network-Level Monitoring Doesn't Even Solve Network Problems 45
3.2 An Example of Causal Tracking 46
3.3 Information Gaps 49
  3.3.1 Examples of Information Gaps 50
3.4 Problem-Relevant Information 51
3.5 Viewing Enterprise Systems 53
3.6 Creating and Coordinating Multiple Views 55
3.7 Hierarchical Viewing
  3.7.1 An Example of Hierarchical Viewing 57
3.8 Summary: Viewing the Electronic Enterprise 59

4 Designing the Electronic Enterprise 61
4.1 Process Architectures 62
4.2 Roles of Architecture in the Process Lifecycle 63
4.3 Constituents of Process Architectures 67
  4.3.1 Annotations 67
  4.3.2 Architectural Structure 68
  4.3.3 Interface Communication Architectures 68
  4.3.4 Architecture Diagrams 70
  4.3.5 Behavior Specification 72
  4.3.6 Design Constraints 74
4.4 Examples of Informal Annotations 74
4.5 Dynamic Process Architectures 78
  4.5.1 Diagrams for Dynamic Architectures? 81
4.6 Layered Architectures and Plug-and-Play 81
  4.6.1 Abstraction Principle 83
4.7 Summary: Technology to Support Process Architecture 84

5 Events, Timing, and Causality 87
5.1 What Events Are 88
5.2 How Events Are Created 90
## Contents

- **5.3 Time, Causality, and Aggregation**
  - 5.3.1 The Cause-Time Axiom 96
- **5.4 Genetic Parameters in Events**
  - 5.4.1 Timestamps 96
  - 5.4.2 Causal Vectors 97
- **5.5 Time** 97
- **5.6 Causality and Posets** 100
- **5.7 Causal Event Executions—Real-Time Posets** 102
- **5.8 Orderly Observation** 109
- **5.9 Observation and Uncertainty** 110
- **5.10 Summary** 111

- **6 Event Patterns, Rules, and Constraints** 113
  - 6.1 Common Kinds of Pattern Searching 113
  - 6.2 Event Patterns 114
  - 6.3 A Strawman Pattern Language
    - 6.3.1 Pattern Matching 117
    - 6.3.2 Writing Patterns in STRAW-EPL 117
  - 6.4 Event Pattern Rules 119
  - 6.5 Constraints 124
  - 6.6 Summary 126

- **7 Complex Events and Event Hierarchies** 127
  - 7.1 Aggregation and Complex Events 127
  - 7.2 Creating Complex Events 129
  - 7.3 Event Abstraction Hierarchies
    - 7.3.1 Viewing a Fabrication Line 132
  - 7.4 Building Personalized Concept Abstraction Hierarchies
    - 7.4.1 Viewing Network Activity 134
    - 7.4.2 Viewing Stock-Trading Activity 138
  - 7.5 Summary 141

**PART II Building Solutions with CEP** 143

- **8 The RAPIDE Pattern Language** 145
  - 8.1 Event Pattern Languages—Basic Requirements 146
  - 8.2 Features of RAPIDE 147
  - 8.3 Types
    - 8.3.1 Predefined Types 149
    - 8.3.2 Structured Types 150
15 Infrastructure for Complex Event Processing 329
  15.1 Examples of Forms of Observed Events 330
  15.2 Interfacing CEP Infrastructure to Target Systems 335
  15.3 CEP Adapters 336
  15.4 CEP Runtime Infrastructure 339
  15.5 Infrastructure Interfaces and Components 340
    15.5.1 Functionality of the Interface 341
  15.6 Off-the-Shelf Infrastructure 343
  15.7 Event Pattern Languages 346
  15.8 Complex Event Pattern Matchers 348
    15.8.1 Quest for Scalability 348
    15.8.2 The Naive View of Pattern Matchers 348
    15.8.3 What Pattern Matchers Really Do 348
    15.8.4 Design Structure 349
  15.9 Rules Management 351
  15.10 Analysis Tools 353
  15.11 Summary 356

Bibliography 357

Index 359
The Power of Events introduces CEP and shows specifically how this innovative technology can be utilized to enhance the quality of large-scale, distributed enterprise systems. The book describes the challenges faced by today’s information systems, explains fundamental CEP concepts, and highlights CEP’s role within a complex and evolving contemporary context. After thoroughly introducing the concept, the book moves on to a more detailed, technical explanation of CEP, featuring the Rapideâ¢ event pattern language, reactive event pattern rules, event pattern constraints, and event processes. Not all events are created equal. Some events leave a long-lasting legacy. This report explores 29 events that have made a difference. The power of events.

Today I am learning how to hygge my home for Christmas. Stay tuned for a home walkthrough. The Power of Events. 29 November at 19:40 Â: New decor for my launch on Saturday.
