Peter Menkhorst has been fascinated by Australia's flora and fauna for most of his life. He has participated in fauna surveys in many parts of Australia and has worked in wildlife research and management in Victoria for thirty-five years. He has published widely in the scientific and popular literature, including editing an Australian bird guide. Frank Knight worked as an illustrator for CSIRO for twenty-five years. He has been a member of and has exhibited with the Society of Animal Art in New York. He has also illustrated a number of natural history books, including an Australian bird g...
A Field Guide to the Mammals of Australia is the only comprehensive guide to identifying all 379 species of mammals known in Australia. This book provides concise and accurate details of the appearance, diagnostic features, distribution, habitat, and key behavioral characteristics of all mammals known to have occurred in Australia. A total of 379 species of mammals have been recorded in Australia and surrounding continental waters; 357 indigenous and 22 introduced. The list includes 2 monotremes, 159 marsupials, 76 bats, 69 rodents (5 introduced), 10 pinnipeds, 3 terrestrial carnivorans (2 recent and 1 sub-recent introductions), 13 introduced ungulates, 2 introduced lagomorphs, 44 cetaceans and 1 sirenian. The taxonomy and nomenclature used here generally follows Van Dyck and Strahan. List of bats of Australia. This fully revised and updated edition of A Field Guide to the Mammals of Australia is the only comprehensive guide to identifying all 382 species of mammals known in Australia. This book provides concise and accurate details of the appearance, diagnostic features, distribution, habitat, and key behavioural characteristics of all mammals known to have occurred in Australia or its waters since the time of European settlement. Each double-page spread provides all the information needed to identify an animal, a full-colour illustration of the entire animal, a smaller diagram of diagnostic feature.
