Kids can cooperate: a practical guide to teaching problem solving. by Crary, Elizabeth, 1942
Teach Kids How to Evaluate the Problem.

Kids who feel overwhelmed or hopeless often won't attempt to address a problem. But, when you give them a clear formula for solving problems, they'll feel more confident in their ability to try. Here are the steps to problem-solving:

1. Identify the problem. Just stating the problem out loud can make a big difference for kids who are feeling stuck. You can also use a problem-solving approach to help your child become more independent. If she forgot to pack her soccer cleats for practice, ask, "What can we do to make sure this doesn't happen again?" Let her try and develop some solutions on her own. Read on to learn key strategies of teaching problem-solving to kids, as well as some age-by-age ideas and activities.
