Preface to Tenth Edition ............................. xii
Introduction .......................................... xvi
How to use this book ................................. xxi

## PART ONE: GENERAL MEDICINE

1. Clinical examination and making a diagnosis ............................ 3
   Clinical examination of the individual animal .......................... 3
   Making a diagnosis .................................. 22
   Prognosis and therapeutic decision-making ............................ 29
   Examination of the herd ................................ 31

2. General systemic states ................................ 39
   Hypothermia, hyperthermia, fever ....................... 39
   Septicemia/Septes ................................... 51
   Toxicemia and endotoxemia ............................ 53
   Hypovolemic, hemorrhagic, massive acute and obstructive shock .... 63
   Allergy and anaphylaxis ................................ 69
   Edema ................................................ 72
   Disturbances of free Water, electrolyte and acid–base balance .... 73
   Pain .................................................. 102
   Stress .............................................. 107
   Localized infections ................................ 110
   Disturbances of appetite, food intake and nutritional status .... 112
   Weight loss or failure to gain weight (Ill drift) ............... 115
   Physical exercise and associated disorders .................... 117
   Diagnosis and care of recumbent adult horses .................. 120
   Sudden or unexpected death ................................ 124

3. Diseases of the newborn ................................ 127
   Perinatal and postnatal diseases ......................... 127
   Congenital defects .................................. 132
   Physical and environmental causes of perinatal disease ........ 138
   Diseases of closed offspring .......................... 145
   Neonatal infection ................................... 146
   Clinical assessment and care of critically ill newborns ........ 160

4. Practical antimicrobial therapeutics ................................. 173
   Principles of antimicrobial therapy ...................... 173
   Practical usage of antimicrobial drugs ..................... 177

5. Diseases of the alimentary tract ................................ 189
   Principles of alimentary tract dysfunction .................. 189
   Manifestations of alimentary tract dysfunction ............... 191
   Special examination .................................... 195
   Principles of treatment in alimentary tract disease .......... 203
   Diseases of the biliary, common and associated organs ....... 205
   Diseases of the pharynx and esophagus ..................... 209
   Diseases of the nonruminant stomach and intestines ........ 215
   Congenital defects of the alimentary tract .................... 280
   Neoplasms of the alimentary tract ........................ 281
   Diseases of the peritoneum ................................ 282

6. Diseases of the alimentary tract – II .............................. 293
   Diseases of the forestomach of ruminants .................... 293
   Special examination of the alimentary tract and abdomen of cattle .... 301
   Diseases of the rumen, reticulum and omasum .............. 311
   Diseases of the abomasum ................................ 353
   Diseases of the intestines of ruminants ..................... 375

7. Diseases of the liver and pancreas ................................. 383
   Diseases of the liver – introduction ...................... 383
   Principles of hepatic dysfunction ........................ 383
   Manifestations of liver and biliary disease ................ 384
   Special examination of the liver ........................ 387
   Principles of treatment in diseases of the liver .............. 391
   Diffuse diseases of the liver ................................ 391
   Focal diseases of the liver ................................ 395
   Diseases of the pancreas ................................ 396

8. Diseases of the cardiovascular system .............................. 399
   Principles of circulatory failure ........................ 399
   Manifestations of circulatory failure ...................... 401
   Special examination of the cardiovascular system .......... 405
   Arrhythmias .......................................... 413
   Diseases of the heart .................................... 421
   Diseases of the blood vessels ............................ 434

9. Diseases of the hemolympathic and immune systems ............ 439
   Abnormalities of plasma protein concentration .............. 439
   Hemorrhagic disease ................................... 441
   Disorders of red cell number or size ........................ 450
   Disorders of white cells ................................ 460
   Lymphadenopathy (lymphadenitis) .......................... 464
   Diseases of the spleen and thymus ........................ 464
   Immune deficiency disorders (lowered resistance to infection) .... 466
   Amyloidosis ........................................... 467
   Periophtharies ........................................ 469

10. Diseases of the respiratory system ............................... 471
    Principles of respiratory insufficiency .................... 471
    Principal manifestations of respiratory insufficiency ....... 473
    Special examination of the respiratory system .......... 480
    Principles of treatment and control of respiratory tract disease ..... 493
    Diseases of the lungs .................................... 498
    Diseases of the pleura and diaphragm ....................... 519
    Diseases of the upper respiratory tract ..................... 530

11. Diseases of the urinary system .................................. 543
    Introduction ........................................ 543
    Principles of renal insufficiency ........................ 543
    Clinical features of urinary tract disease ................. 545
    Special examination of the urinary system ................. 548
    Principles of treatment of urinary tract disease ............ 553
    Diseases of the kidney .................................... 555
    Diseases of the bladder, ureters and urethra .............. 561
    Congenital defects of the urinary tract ..................... 571

12. Diseases of the nervous system .................................. 575
    Principles of nervous dysfunction ........................ 575
    Clinical manifestations of disease of the nervous system .... 577
    Special examination of the nervous system ................ 583
    Principles of treatment of diseases of the nervous system ..... 594
    Pathophysiological mechanisms of nervous system disease .... 596
    Diffuse diseases of the brain ................................ 596
    Focal diseases of the brain ................................ 606
    Diseases of the meninges ................................ 609
    Toxic and metabolic encephalomyelopathies ................. 611
    Psychoses or neuroses .................................. 612
    Epilepsy ............................................. 613
    Diseases of the spinal cord ................................ 613
    Diseases of the peripheral nervous system ................ 618
    Congenital defects of the central nervous system ........... 619

13. Diseases of the musculoskeletal system .......................... 621
    Principal manifestations of musculoskeletal disease ......... 621
    Diseases of muscles .................................... 626
    Diseases of bones ...................................... 632
    Diseases of joints ...................................... 637
    Congenital defects of muscles, bones and joints .......... 648

14. Diseases of the skin, conjunctiva and external ear ................ 651
    Principles of treatment of diseases of the skin ............... 651
    Diseases of the epidermis and dermis ....................... 654
    Diseases of the hair, wool, follicles, skin glands, horns and hooves .... 661
    Diseases of the subcutis ................................ 664
    Granulomatous lesions of the skin ........................ 667
    Cutaneous neoplasms ................................... 667
    Congenital defects of the skin ................................ 669
    Congenital skin neoplasms ................................ 669
    Diseases of the conjunctiva ................................ 670
    Congenital defects of the eyelids and cornea ............... 670
    Diseases of the external ear ................................ 670

15. Diseases of the mammary gland ................................ 673
    Introduction ........................................ 673
    Bovine mastitis ........................................ 673
    Mastitis pathogens of cattle ............................. 697
Diseases associated with Campylobacter spp. 1085
Diseases associated with Leptospira Borrelia spp. 1094
Diseases associated with Mycoplasma spp. 1123

21. Disease associated with viruses and Chlamydia - I 1157
Viral diseases with manifestations attributable to involvement of the body as a whole 1157
Viral diseases characterized by alimentary tract signs 1223

22. Diseases associated with viruses and chlamydia - II 1307
Viral diseases characterized by respiratory signs 1307
Viral diseases characterized by nervous signs 1368
Viral diseases characterized by skin lesions 1418
Diseases associated with Chlamidiae 1433

23. Diseases associated with prions 1439

24. Diseases associated with Ricottisiales 1455

25. Diseases associated with algae and fungi 1471
Algal diseases 1471
Fungal diseases 1471
Dermatomycoses 1476

26. Diseases associated with protozoa 1483
Diseases associated with trypanosomes 1531

27. Diseases associated with helminth parasites 1541
Nematode diseases of the alimentary tract 1541
Nematode diseases of other organs 1564
Diseases associated with trematodes and cestodes 1576

28. Diseases associated with arthropod parasites 1585
Ked and louse infestations 1596
Tick infestations 1599
Miscellaneous flies, mites and mosquitoes 1603
Mite infestations 1606

29. Metabolic diseases 1613
Production diseases 1618

30. Diseases associated with nutritional deficiencies 1691
Deficiencies of energy and protein 1697
Diseases associated with deficiencies of mineral nutrients 1698
Diseases associated with deficiencies of fat-soluble vitamins 1771
Diseases associated with deficiency of water-soluble vitamins 1778

31. Diseases associated with physical agents 1785

32. Diseases associated with inorganic and farm chemicals 1798
Diseases associated with inorganic poisons 1799
Diseases associated with farm chemicals 1830
Miscellaneous farm chemicals 1846

33. Diseases associated with toxins in plants, fungi, cyanobacteria, clostridia, bacteria, insects and animals 1851
Diseases associated with major phytoxins 1851
Poisoning by mycotoxins 1897
Poisoning by cyanophytes (cyanobacterial) toxins 1913
Poisoning by tunicamycines (corynebacteria) 1914
Diseases associated with zootoxins (animal bites and stings) 1915

34. Diseases associated with allergy 1921

35. Diseases associated with the inheritance of undesirable characteristics 1937
Diseases characterized by chromosomal anomalies 1939
Inherited defects of the body as a whole 1940
Inherited defects of the alimentary tract 1943
Inherited defects of the circulatory system 1944
Inherited defects of the urinary tract 1948
Inherited defects of the nervous system 1948
Inherited defects of the musculoskeletal system 1957
Inherited defects of the skin 1973
Miscellaneous inherited defects 1976

36. Specific diseases of uncertain etiology 1981
Diseases characterized by systemic involvement 1981
Diseases characterized by alimentary tract involvement 1988
Diseases characterized by respiratory tract involvement 1996
Diseases characterized by nervous system involvement 2004
Diseases characterized by involvement of the musculoskeletal system 2021
Diseases characterized by involvement of the skin 2035

APPENDICES
Conversion factors 2045
Reference laboratory values 2047
Drug doses – horses and ruminants 2051
Drug doses – pigs 2064
Index 2067
The new 10th edition of this well-respected reference includes thoroughly revised and reviewed information with content on new diseases for the most up-to-date information on diseases effecting sheep, pigs, goats, horses, and cattle. Divided into two sections, General Medicine and Special Medicine, the book covers topics ranging from the clinical examination and manifestation of disease in organ systems to specific diseases of the large animal species. ...more.
